This game rocked! It is a a unique 3D pool experience that needs to be in every social vr setting. The controls are smooth. I thought it would be confusing to line up shots, but the interaction with the balls is so natural. I also like how you can interact with the table, it is nice to feel in control of your shot. Very interesting to watch the other player fly around with their jet packs. I can only imagine how I must look. Playing multiplayer is a blast! I love pool, and It is really inspiring to see this on steam. I can't wait for the active user count to go up so I can play more multiplayer!. I am not a big fan of traditional pool, but this was fun. I felt like I was on the holodeck playing the 24th century classic game.

Solo was fun to practice but the game is even better with friends.

I recommend this game to anyone who plays VR. Try playing with fruit or other nontraditional balls.

There is some glitchiness when you start a level where the leaderboard is visible. The menu is also quite sensitive to touch. Overall though it felt really nice.
